

LEGO CONSTRUCTION COMPANY

HEY GUYS, GREAT JOB ON THE GARAGE, BUT I AM THINKING SOME LANDSCAPING NEEDS TO BE DONE TO MAKE IT ONE OF A KIND. ARE YOU UP FOR THE CHALLENGE?

LANDSCAPING - TREES

1. There needs to be **3** different trees.
2. The 3 trees need to be placed in the front of the garage according to **height** from greatest to least.
3. Tree #1
 - a. Needs to be **6-8 cm high**
 - b. It needs to have a total of **4 branches** coming out of the top
 - c. **3/4** of the branches need to be one specific colour.
4. Tree #2
 - a. Needs to be **10-12 cm high**
 - b. It needs to be a **spiraling tree**
5. Tree #3
 - a. Needs to be **8-10 cm high**
 - b. It needs to have an **apex** (**not included** in the height)
6. The City of Lego is holding a contest for the best looking tree in each front yard. You need to **survey** either grade 4 Loewen class or grade 2 Meszaros. You need to come up with ballot for each individual student in that class to vote anonymously. You need to submit the **final tally results** to the City, so they may announce the winner.
